

Vega65

Designed by TLS. Built without compromise.

Introducing Vega65 — a large-format lens system designed and built in-house by TLS. Developed from years of rehousing expertise and close collaboration with filmmakers, Vega65 delivers true 65mm sensor coverage with consistent character, precise mechanics, and modern performance.

Engineered for today's large-format cameras, every focal length in the nine-lens set is matched for seamless visual continuity, controlled depth, and smooth fall-off across the frame. Fast apertures, exceptional close-focus performance, and a compact, well-balanced design make Vega65 a practical, adaptable system for demanding productions.
